

Industrial Use

Bruno Caetano Vidigal

Food and Agriculture Organization of the United Nations

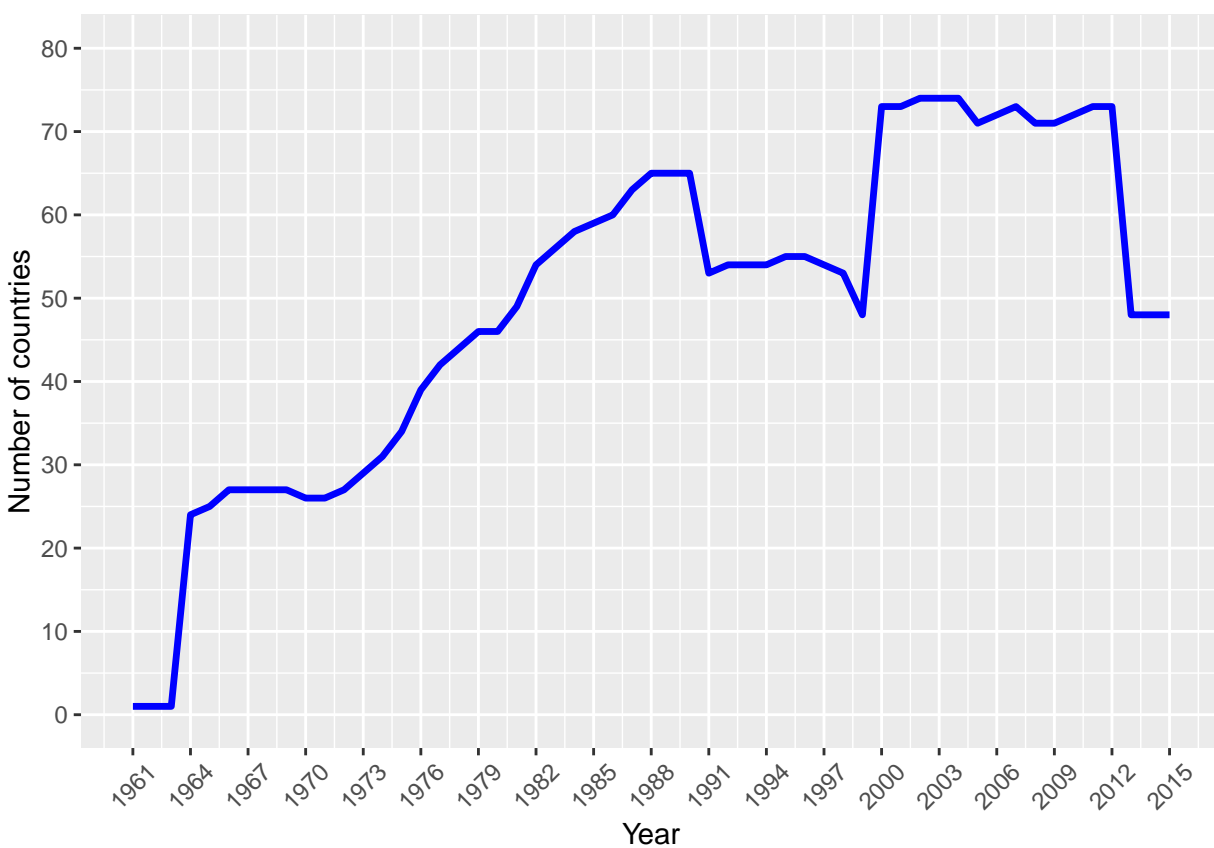

About this document

In this document there are some statistics and summaries about the **Industrial Use**.

1. Summaries

Number of distinct countries	Number of distinct commodities	Min Date	Max Date
157	19	1961	2015

In the plot below, we can see the number of distinct countries with values for industrial utilization per year.

2. Countries with more production for Industrial utilization in 2015

Look at the 5 countries with more production for Industrial utilization represent **67.1%** of all in 2015.

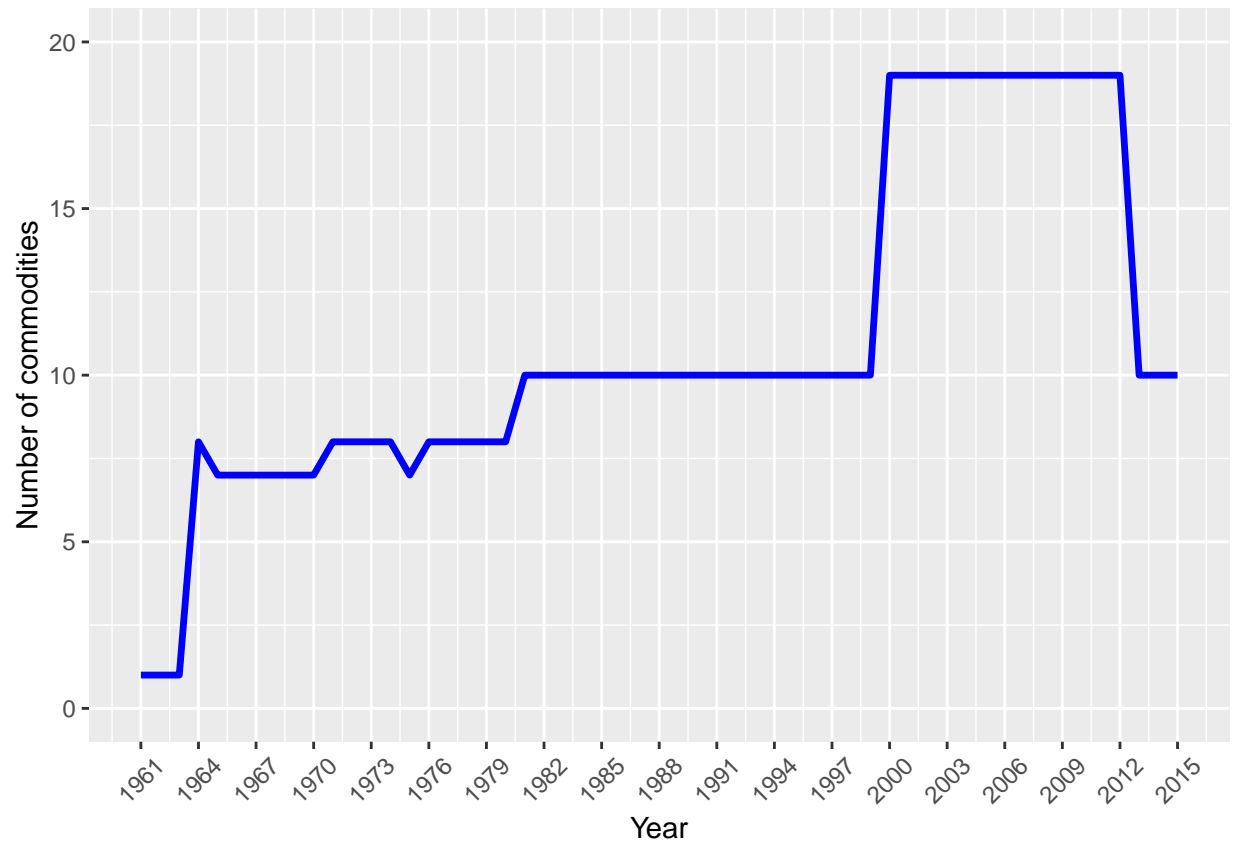

Country	Value	%	Cumulative %
Brazil	6.599.000	17.7	17.7
Indonesia	5.705.000	15.3	33.0
Argentina	4.362.000	11.7	44.7
China	4.292.000	11.5	56.2
Malaysia	4.088.000	10.9	67.1

3. Commodities with more production for Industrial utilization in 2015

Look at the 5 commodities with more production for Industrial utilization represent **95.2%** of all in 2015.

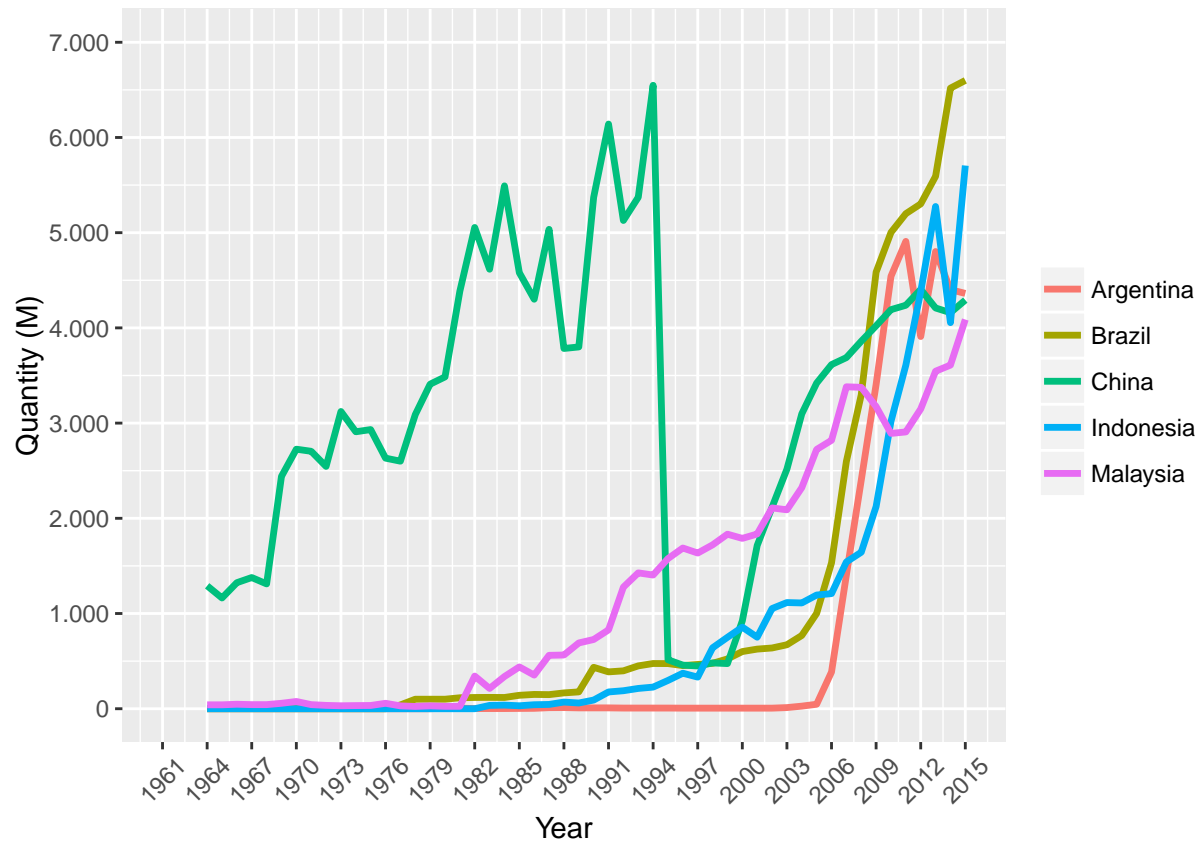

Commodity	Value	%	Cumulative %
Palm oil	13.749.000	36.8	36.8
Soya bean oil	12.951.000	34.7	71.5
Oil of Palm Kernel	5.157.000	13.8	85.3
Flours and meals of oil seeds or oleaginous fruits, except those of mustard	2.295.000	6.1	91.4
Sunflower-seed and safflower-seed oil	1.427.000	3.8	95.2

The plot below shows the number of commodities with industrial utilization.

4. Times series for the five countries with more industrial utilization in 2015

The plot below shows the times series for the five countries with more industrial utilization in 2015.

5. Times series for the five countries with more industrial utilization in 2015

The plot below shows the times series for the five commodities with more industrial utilization in 2015.
